

Electrical Site Survey

What is the primary purpose of this service (Ex: Home, Shop, Business, etc.)

Will the service be single-phase or three-phase?

If three-phase, what voltage is required?

What size service are you requesting (Ex: 100A, 200A, 320A, 400A, 600A, etc.)

What is the square footage of the building?

Is the building multi-storied? If yes, how many stories?

Is the building all electric or will gas appliances be used?

What type and size of heating equipment will the building use?

Is there a backup heat source? If yes, then what type and size?

What Type of Air Conditioning will be used (ground source, air source, etc.)?

How many AC units will be installed?

What is the SEER rating, tonnage and breaker size of the AC unit(s)

Will an electric on-demand water heater be installed? If yes, how many units will be installed?

Will any kind of stand-by or on-site generation be installed?
(ex. Solar panels, wind turbine, propane generator)

Will there be any detached buildings such as a Garage, Barn or Shop that will use electricity?
If yes, please include an additional site survey for the detached building.
