**TO VERIFIERS OF UTILITY CUSTOMERS HAVING
LIFE-THREATENING CONDITIONS**

The Oklahoma Corporation Commission requires electric and gas utilities under its jurisdiction to honor certificates which attest to the fact that a utility customer or a permanent member of the household has a medical condition which places his/her life in jeopardy, and which would be further aggravated by the discontinuance of the aforementioned utility services. The respective customer may certify the condition for 72 hours but further verification of the condition is required if it persists beyond a 72 hour period. Verification may be by a physician, licensed practitioner of the healing arts, public health official or a government social service official. Such verification is valid for 30 days and must be renewed or reverified every 30 days. You are being asked to provide verification that the stated condition still exists, and will continue to exist for the next 30 days.

Please be advised that your actions in this matter may result in this person being permitted to use utility services without immediate payment if their financial condition so warrants. However, full restitution is required when the "life-threatening" condition ceases to exist.

We appreciate your willingness to participate as verifier and trust you will do so advisedly considering the fact that energy consumed during this period must eventually be paid for by the utility customer.

We want to assure that those utility customers having a genuine life-threatening condition in their homes are not mistaken for those who would abuse this privilege at the expense of other ratepayers.
